

# Inseqr CyberCompany

## Who for?

CyberCompany offers a comprehensive cyber security solution for companies.

We support companies for which issues of security, protection of their assets and communication are crucial.

## What distinguishes the Inseqr solution?

At Inseqr, we have created a broad digital security ecosystem. Essential elements within this ecosystem are information about existing threats, knowledge of effective defences and tools to secure company assets and respond to emerging threats.

## WE CREATE A CULTURE OF SECURITY

### CyberCompany

We have created an ecosystem of activities and solutions ensuring cyber security in the company. We offer the development and implementation of a **Cyber Security Strategy** and prepare employees for cyber threats through training - **"Safe Employee"**.

We understand the importance of proven and secure data transfer and communication systems, which is why we offer - **2SecureVPN** and **SafeTalk** communicator. Another element of CyberFirma concerns predicting the future. With effective analysis of the infosphere, this is possible! We provide OSINT - class analytical solutions and additionally training in **"White Intelligence"**.

## What do we offer?

### CYBER SECURITY STRATEGY

We will audit and analyse your ICT security system, develop recommendations for cyber security measures and support their implementation. We will provide assistance to the Cyber Security Officer, conduct penetration tests and implement effective cyber systems, etc.

### HIGHLY SECURE TRANSFER AND COMMUNICATION SYSTEMS

**SafeTalk** – a communicator that provides users with a guarantee of full security of transmitted data and conversations. SafeTalk ensures that information does not leak uncontrollably to both cyber criminals and the services.

**2SecureVPN** – an ultra-secure, double-safe VPN. This is a system that allows the transmission of confidential data. Upon request, we certify this solution.

### "SAFE EMPLOYEE" TRAINING

Everyone in the company benefits from the support of the digital infrastructure on a daily basis, which is why at Inseqr we arrange comprehensive in-company and on-line training for employees at different levels of technology - from basic cyber security knowledge to specialised training for IT staff.

### OSINT Training

We are specialised in providing **OSINT**-class tools, and therefore we offer training on "White Intelligence", i.e. the acquisition of information from open sources. During the practical training, there will be examples using the **Quaero** analytical tool.

## Why Inseqr?

Inseqr holds an industrial security certificate. Our team includes individuals with IT certificates and high-security clearances, and therefore we also provide classified services and projects.

Our trainers are experts, active academic lecturers and practitioners – specialising in cyber security issues.

Our solutions are trusted by institutions responsible for state security, public administration institutions, local government units and business representatives.

We cooperate with Poland's leading technical universities.

**We focus** on providing innovative solutions in the broad field of ICT security.

**Our team** is composed of developers and managers, academics and practitioners, creating innovative solutions for public institutions and for business, with **security clearances** that enable the implementation of classified projects.

**With an Industrial Safety Certificate**, we provide services and projects covered by the secrecy clause.

**Our expertise** is focused on providing services and products that ensure the security of public institutions and business.

At Inseqr – we create a culture of security, our values are – **competence and trust.**
