

# Inseqr Quaero

## Who for?

For any individual, institution or organisation that values confirmed and verified information. Interested in knowing whether someone is blackmailing you, or verifying whether information about your new patent or idea is leaking out, or perhaps investigating feedback on your new product, or examining the connections and credibility of your contractor? You will benefit from all this and much more with Quaero.

## What distinguishes the Inseqr solution?

We can customise Quaero swiftly and effectively. Our tool enables analysis, connections and keyword searches in open sources and records, as well as in customer-designated internal databases and data from customer file resources. The tool facilitates the creation of multi-user accounts, teamwork, the creation of groups with access to shared resources; the processed information is visualised in the form of dynamic and multi-object graphs. Due to its architecture, the solution is fully scalable.

## WE CREATE A CULTURE OF SECURITY

### QUAERO

At Inseqr, we are specialised in providing OSINT-class analytical tools, and therefore we present - Quaero. It is a state-of-the-art analytical platform offering the possibility to efficiently search, combine and analyse data from open sources on the Internet and, importantly, from the client's individual resources.

## Advantages
