

# Inseqr Softwarehouse

## Who for?

We implement projects for public administration, institutions responsible for state security, local government units and business representatives. Therefore, we are familiar with the specific nature of the work of each demanding partner.

## What distinguishes the Inseqr solution?

Inseqr is certified for industrial security. Our team includes individuals with IT certificates and high-security clearances, and therefore we also provide sensitive services and projects covered by the secrecy clause.

## WE CREATE A CULTURE OF SECURITY Softwarehouse

Our team is composed of experienced developers, architects, controllers, pentesters and testers, with experience in large, nationwide projects, including those with significant security implications, as well as commercial projects.

## The Team's experience includes development of:

mObywatel system and the main gov.pl portal (backend system and mobile applications) – approximately 10 million installations

Trusted Profile, National Node – a system for identification and authorisation of Citizens

Central Banking System for a major Polish Bank

Analytical and OSINT tools

Centralised Settlement System

State Registers (SRP, PESEL, CEPIK)

Support system for the National Educational Network (OSE) and Educational Anti-Smog Network

Cross-border Node – Identity Identification System between EU countries and systems related to the National Cyber Security System (CSIRT-NASK) and the Chancellery of the Prime Minister
